Application/Control Number: 10/625,566 Page 2

Art Unit: 2829

Restriction to one of the following inventions is required under 35 U.S.C. 121:

١. Claims 1-5, drawn to a second plate-like member, classified in class 324.

subclass 754.

11. Claims 6-11, drawn to a plate-like member, classified in class 324, subclass 754.

Inventions II and I are related as combination and subcombination. Inventions in this

The inventions are distinct, each from the other because:

relationship are distinct if it can be shown that (1) the combination as claimed does not require

the particulars of the subcombination as claimed for patentability, and (2) that the

subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant

case, the combination as claimed does not require the particulars of the subcombination as

claimed because the combination does not require all of the details of the subcombination and

at least claim 6 serves as an evidence claim that such is the case. The subcombination has

separate utility such as by itself for its intended purpose or in a different combination.

Because these inventions are distinct for the reasons given above and have acquired a

separate status in the art because of their recognized divergent subject matter, restriction for

examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an

election of the invention to be examined even though the requirement be traversed (37 CFR

1.143).

Any inquiry concerning this communication should be directed to Ernest F. Karlsen at

telephone number 571-272-1961.

Ernest F. Karlsen
